

## Elijah Wendel Sustainable Project Self Critique

For this project I would have improved on some of the following features: Implement the sidebar navigation with the ability to expand into subsists, making it look like it floats on the page rather than fixed, and allowing to minimize the sidebar if the user does not want to have it on the screen. I would have liked to improve the color scheme of the design with more elaborate detailing. Also, for the top bar navigation I would have liked to make a better design and for it to stay as you scroll through the page, but pop back up when you scroll up on the page. For information design I think I could have done better and improved the structure by being more strategic with spacing between paragraphs and a more appealing style.
